

Q 8. Write a JavaScript program for swapping of two numbers

Ans:

```
function swapNumbers(num1, num2) {  
    console.log("Before swapping: num1 =", num1, ", num2 =", num2);  
  
    var temp = num1;  
    num1 = num2;  
    num2 = temp;  
  
    console.log("After swapping: num1 =", num1, ", num2 =", num2);  
}  
  
var num1 = 5;  
var num2 = 10;  
  
swapNumbers(num1, num2);
```

Output:

```
Before swapping: num1 = 5 , num2 = 10    script.js:2  
After swapping: num1 = 10 , num2 = 5    script.js:8  
>
```
