

**Q 5. Write a JavaScript program to find area of rectangle**

**Ans:**

**Area = length × width**

```
function calculateRectangleArea(length, width) {  
    return length * width;  
}  
  
var length = 5;  
var width = 8;  
  
var area = calculateRectangleArea(length, width);  
  
console.log("Length: " + length + " units");  
console.log("Width: " + width + " units");  
console.log("Area: " + area + " square units");
```

**Output:**

```
Length: 5 units      script.js:10  
Width: 8 units      script.js:11  
Area: 40 square units  script.js:12  
>
```
